

Entity Framework Code First Assignment

Generate Following Tables using Code first approach

Employee Table

Empid	Varchar(10)	Primary key
EmpName	Varchar(20)	
DeptID	int	(FK)
Salary	Int	
DOB	Date	

Department Table

DeptID	int	Primary key
DepartmentName	Varchar(20)	
Manager	Varchar(20)	
DepartmentEdit	Timestamp	

- Department name should **be Finance or HR**(Hint use Regular Expression Attribute)
- EmpID should start with **E following 3 digits**
- Salary Should be between than **50000 – 150000**
- Accept data dynamically for Employee and Department
- After Entering Data it should prompt for the user saying “**Do you want to continue (Y/N)?**”
- Show all Records from Employees along with **Bonus of 30% on Salary**(create Extension Method for the same)
